This is the Incomplete Plug-In.

By UniversalWolf (kjetil@bucky.win.bright.net).

The plug-in is called Incomplete because it is not finished, although there is a reasonably large area with a reasonably large number of missions to play if that's all you want to do. I encourage anyone (or any team of people) who wants to try and complete the plug to do so. I'm not going to work on it anymore, but I'll answer any questions you have if I can.

If you want to use the graphics or sounds contained here for your own plug-in, please do so, but I would appreciate it if you gave me credit for my work.

The pictures of the Nassanites are based on images from the great Monty Python film, 'Life of Brian.' I had to use them because they're so hilarious.

You should probably not read the developer notes unless you plan on adding to the plug, or you are tired of playing it but would like more information.

The plug is specifically made for larger screen resolutions (like 1024x768). I make no recommendations as to what it may do on smaller screens.

If you see me - UniversalWolf - in the game, you should probably run.
